## ACADEMIC PROJECTS

---

### **OverLoad Indicator With Digital Meter** | *Aurduino IDE, Embedded C*

- Led the design and implementation of the Arduino-based system.
- Designed the circuitry for sensor interfacing and digital meter control
- Collaborated with team members to achieve project goals
- Successfully detected and displayed overload conditions with 99% accuracy

### **Low Power Timing Error Tolerant Circuit By Controlling A Clock** | *Tanner eda, S-edit, T-spice*

- Spearheaded the design and development of the low-power timing error-tolerant circuit
- Implemented innovative clock control strategies to optimize power consumption
- Performed rigorous testing and validation to ensure circuit reliability
- Demonstrated problem-solving skills by addressing complex timing challenges

## PERSONAL PROJECTS

---

### **Spotify Music Player Clone** | *HTML, CSS, And JavaScript*

- Created a clone of Spotify Music Player to get better understanding.
- The created UI is responsive and have implemented a basic functionality using Javascript
